

Desisters & Detransitioners Study

Seeking volunteers to complete an online, anonymous survey for a Brown University research study

The purpose of this research is to learn about the experiences of desisters and detransitioners--specifically, to explore: factors that may or may not be related to the development of and desistance from transgender identification; whether or not individuals experienced changes in their sexual orientation during and after transgender-identification; and (when applicable) what kinds of counseling and informed consent were received when individuals sought medical care to transition.

To participate in this research, you must:

- Be 18-25 years of age
- Live in the United States
- Have previously identified as transgender (for at least 6 months)
- Did NOT identify as transgender before you were 12 years of age
- Are NOT identifying as transgender now
- Have stopped identifying as transgender at least 6 months ago

Participation in this study includes:

- An online, anonymous screener survey to determine if you are eligible for the study (3-5 minutes), and
- An online, anonymous research survey about your experiences (60-90 minutes)

To start the screener survey, follow this link:
